

Downloading and Registration Instructions for MediDrive Mobile Member App

Step 1

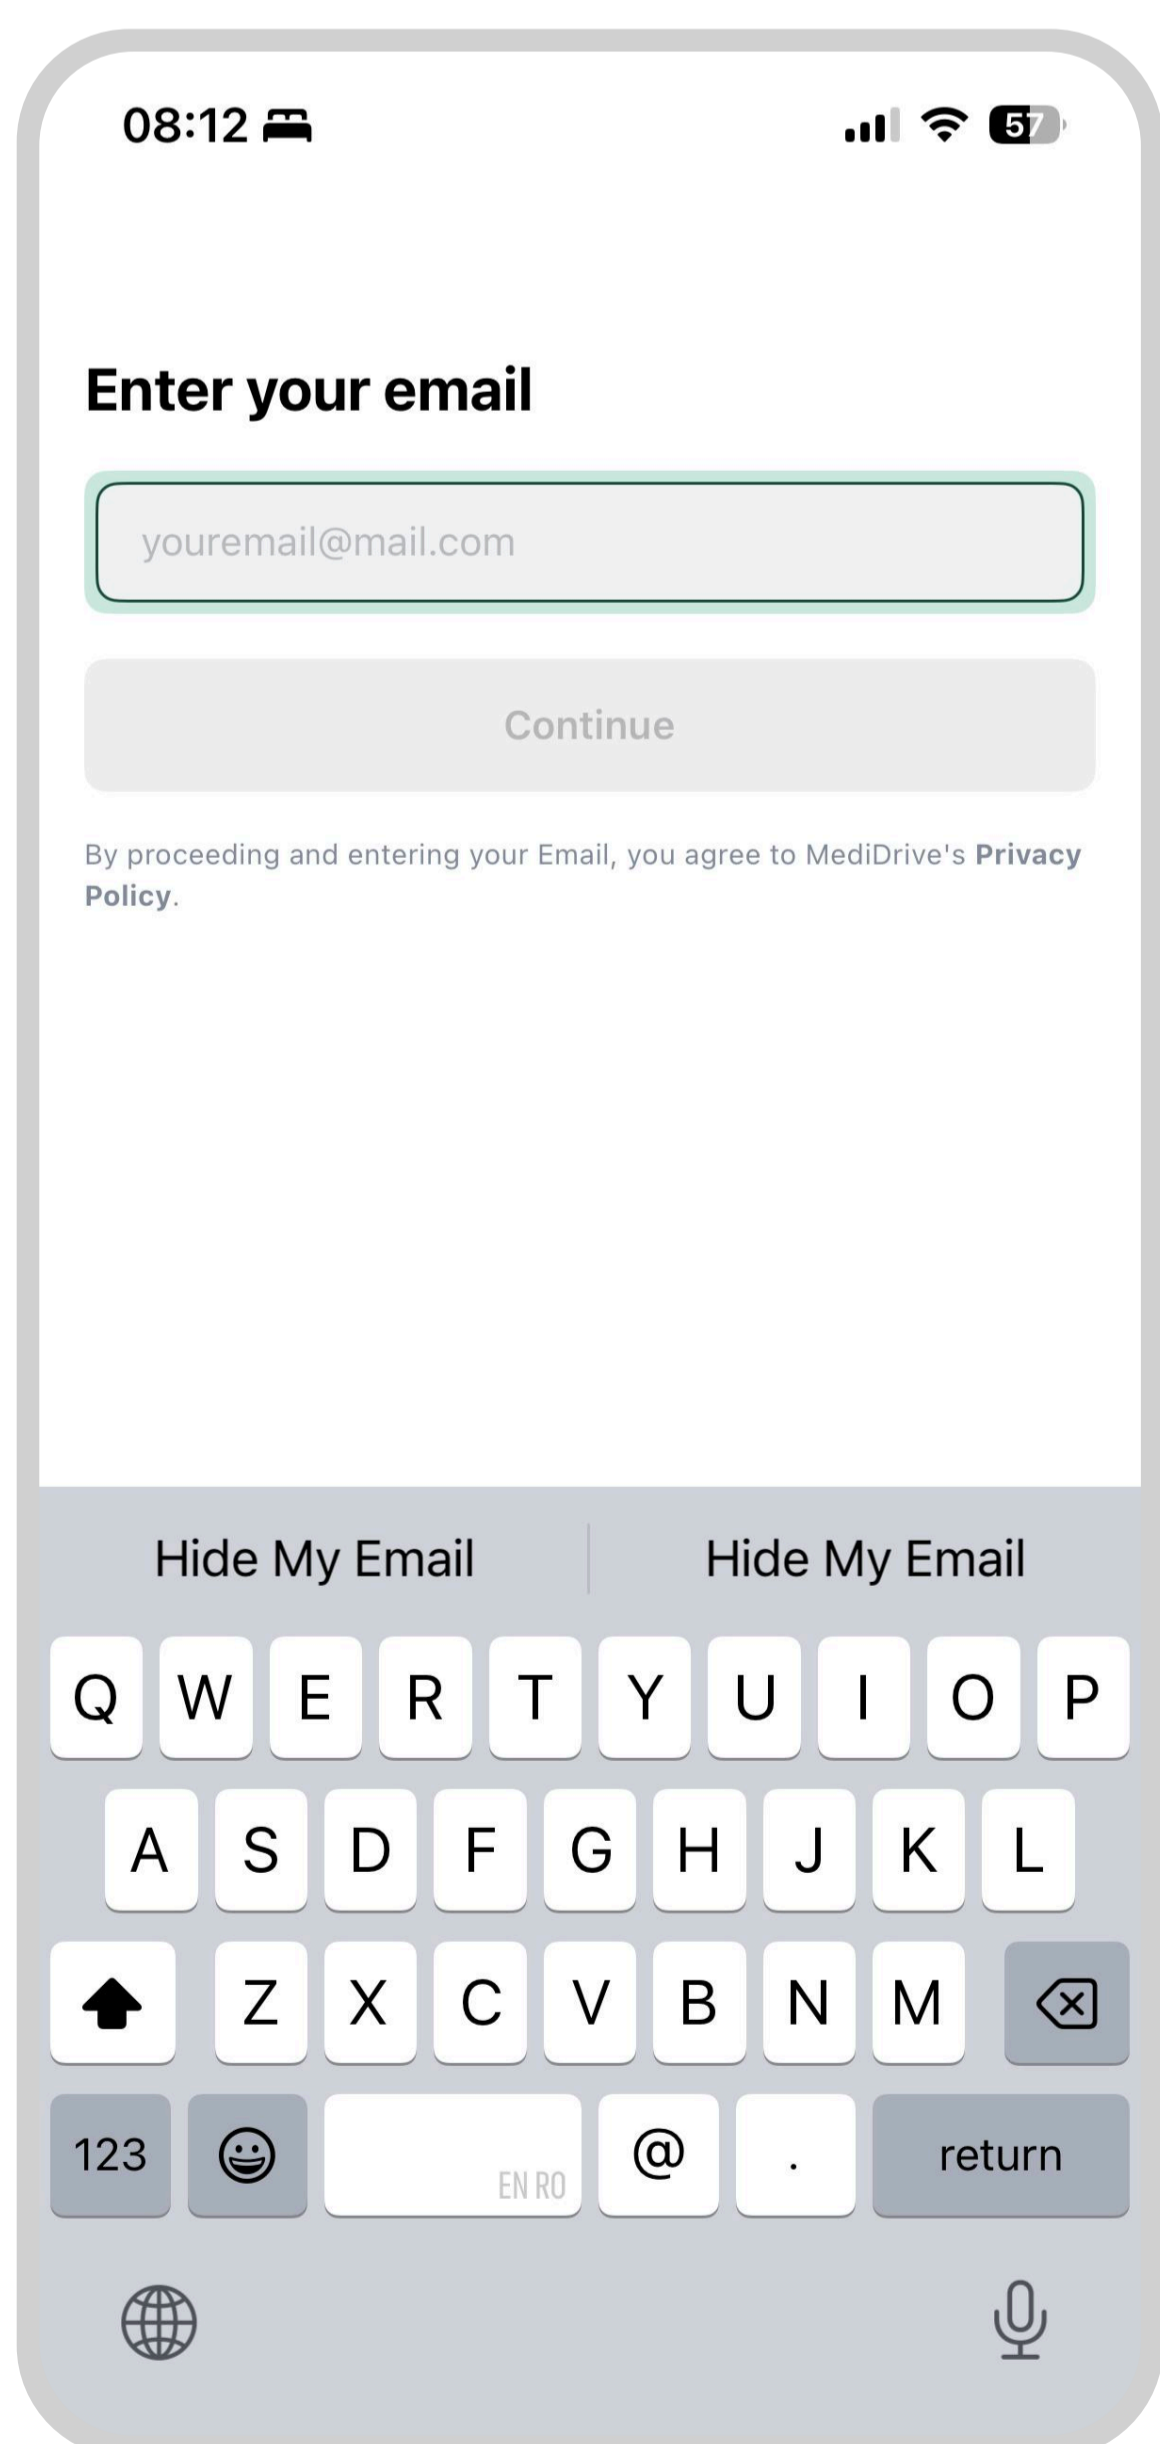

Download the MediDrive Member app

Go to your mobile device's app store (Apple App Store or Google Play) and search for MediDrive app.

You will see two MediDrive Apps, one is for booking rides for members, the other is for drivers.

Download the one titled "MediDrive" for booking rides for members.

Step 2

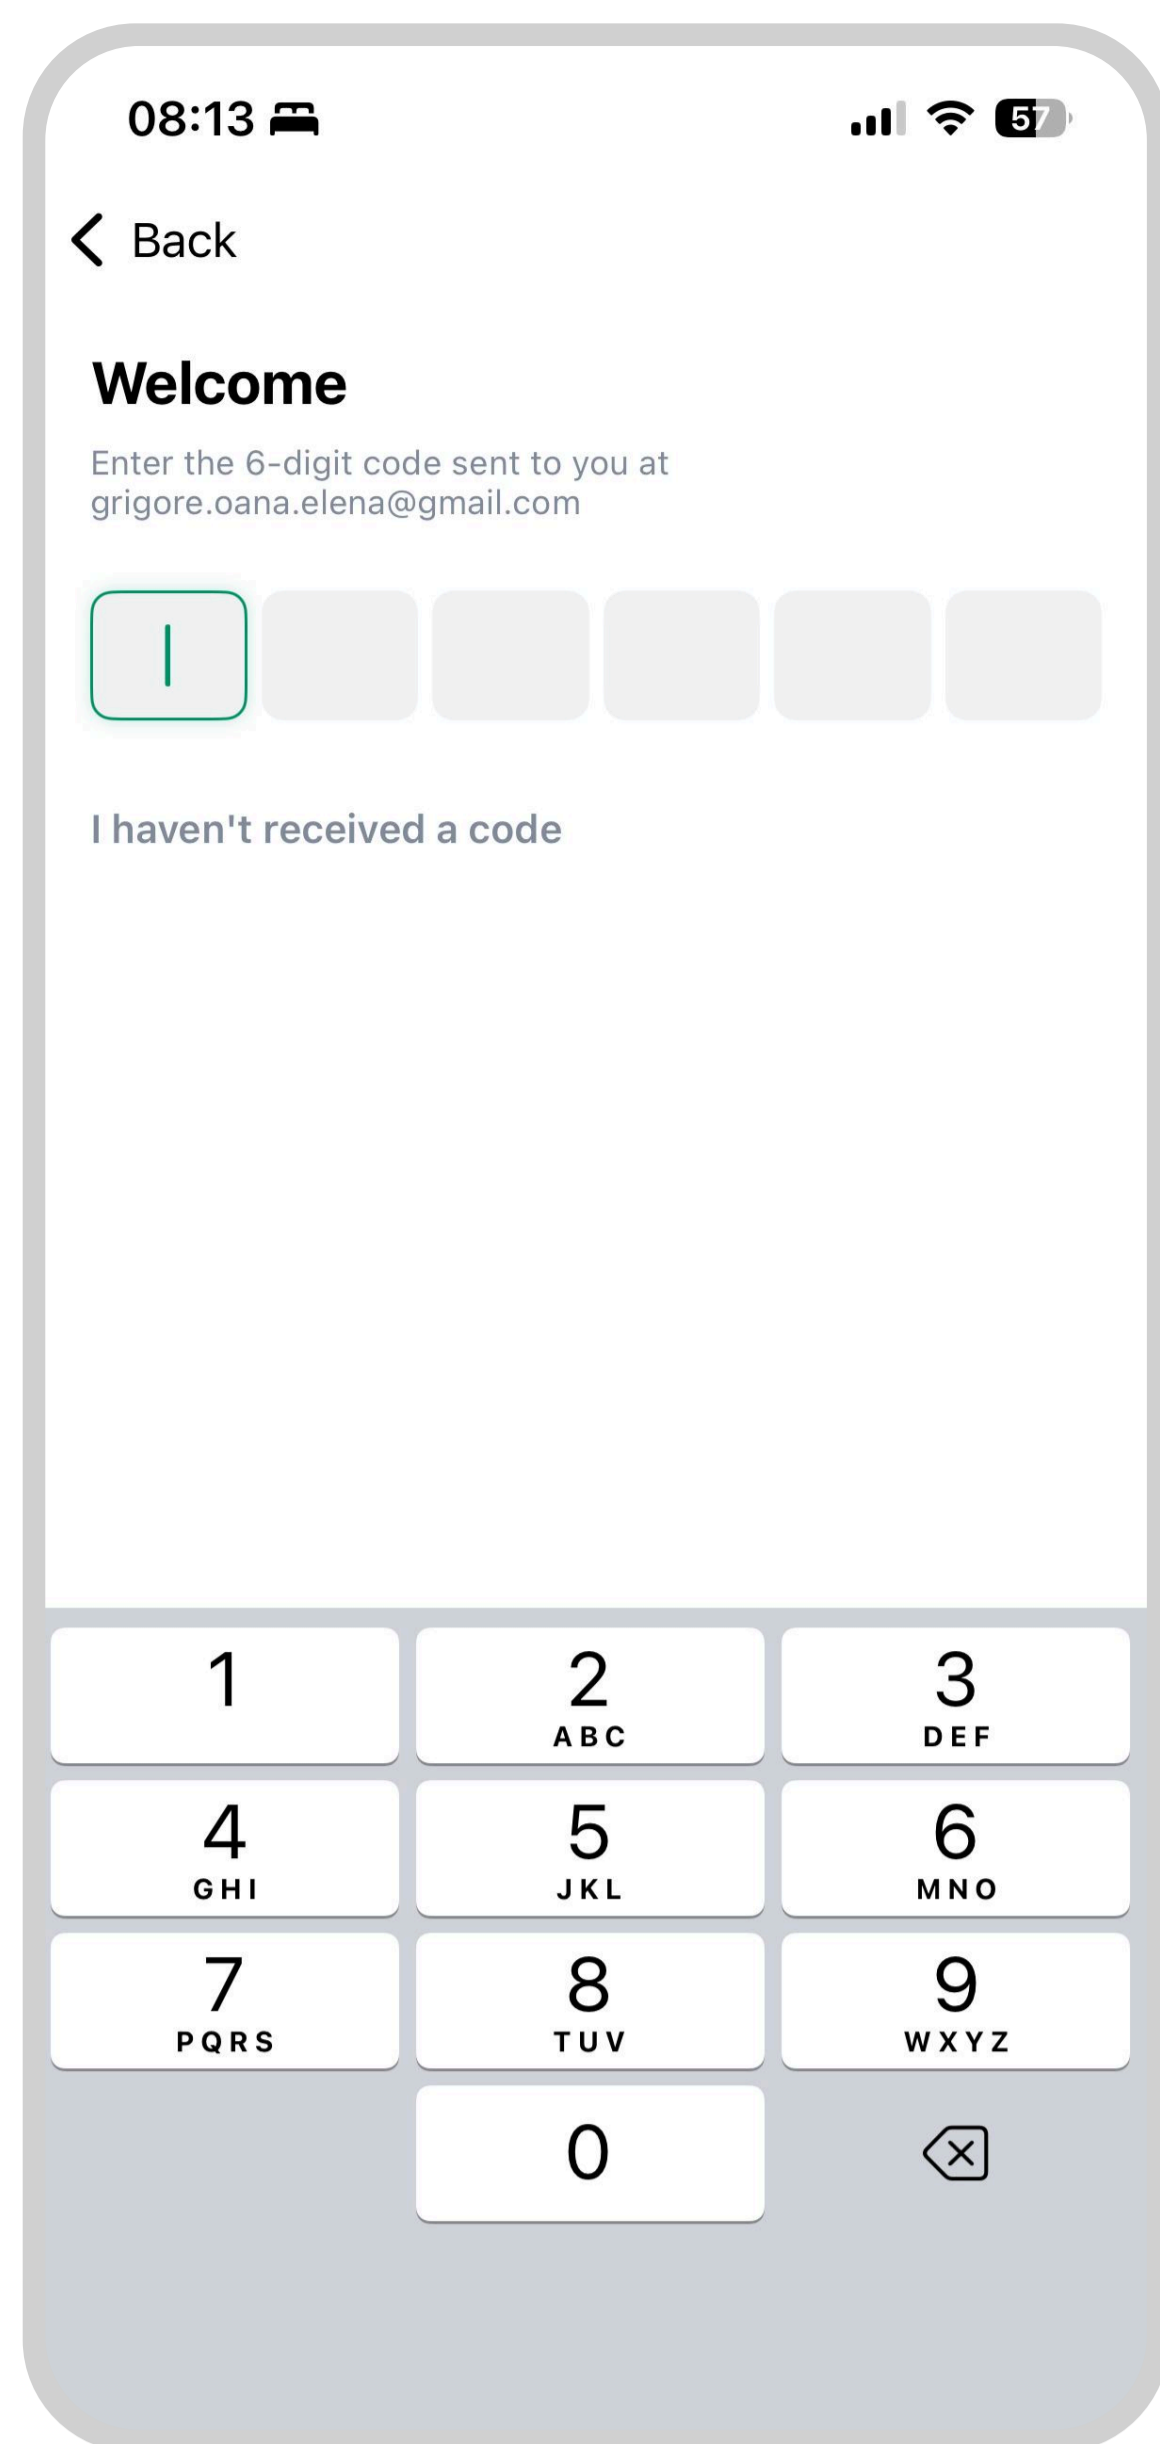

Register to establish your account

Once you download the app, open it and register.

You will be registering as a User of the application.

When opening the app for the first time, you will see an "enter email" screen.

Enter a valid email that you use most often.

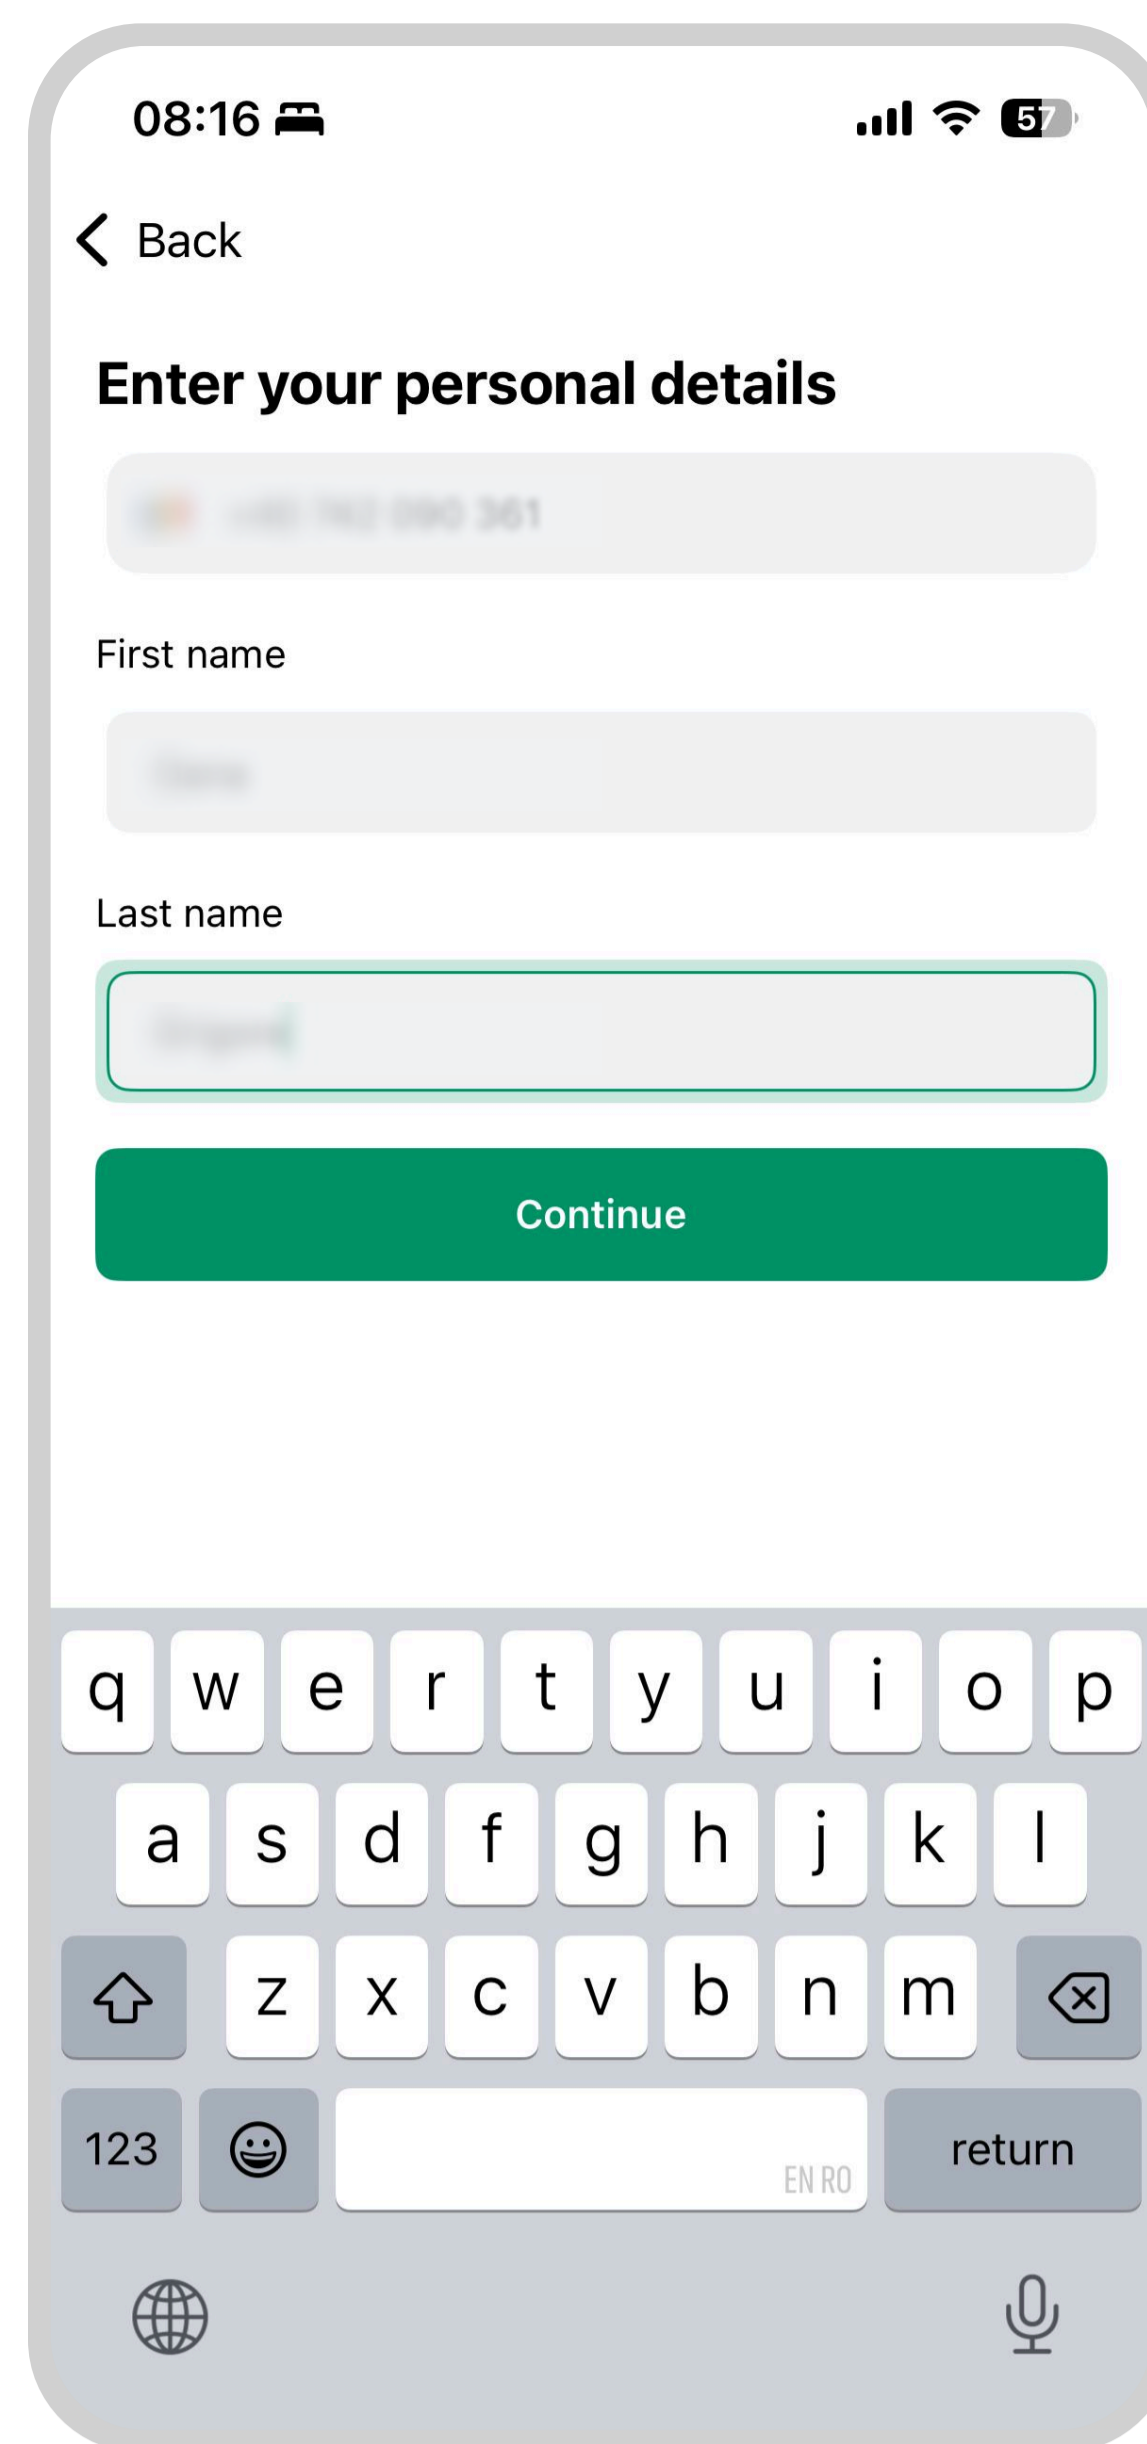

Step 3

Verify your email

After entering your email, you will be sent a 6-digit code to verify it.

Go to your inbox for the email you used to register, find the message from MediDrive and **enter the code into the mobile app.**

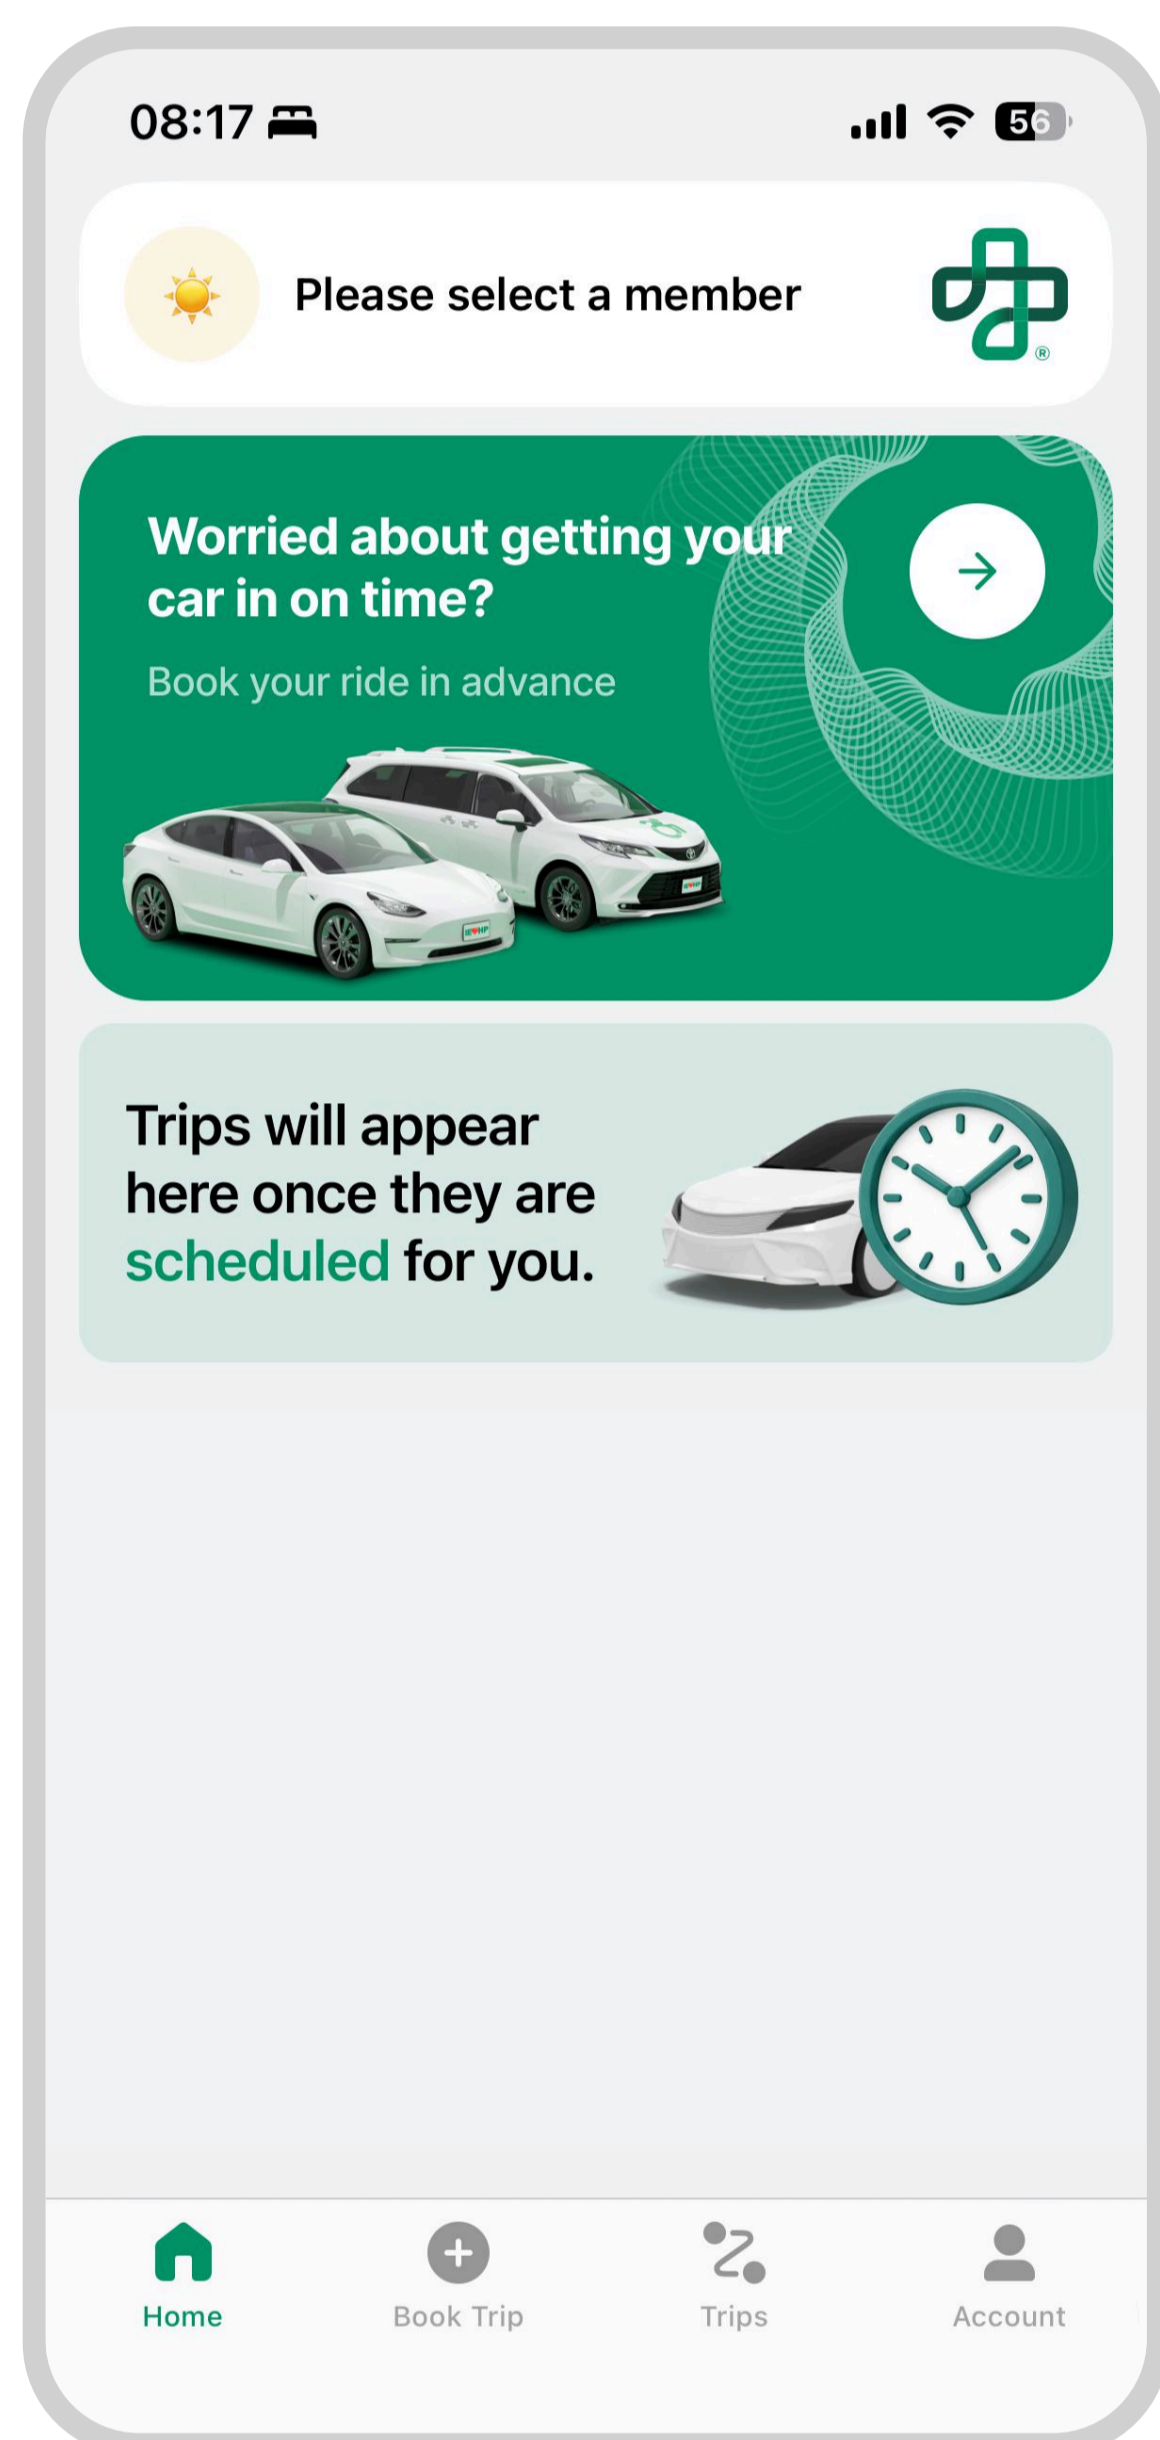

Step 4

Enter your contact information

After successfully entering the code, you will now be prompted to enter your phone number, first name and last name.

We need this information in order to arrange your transportation.

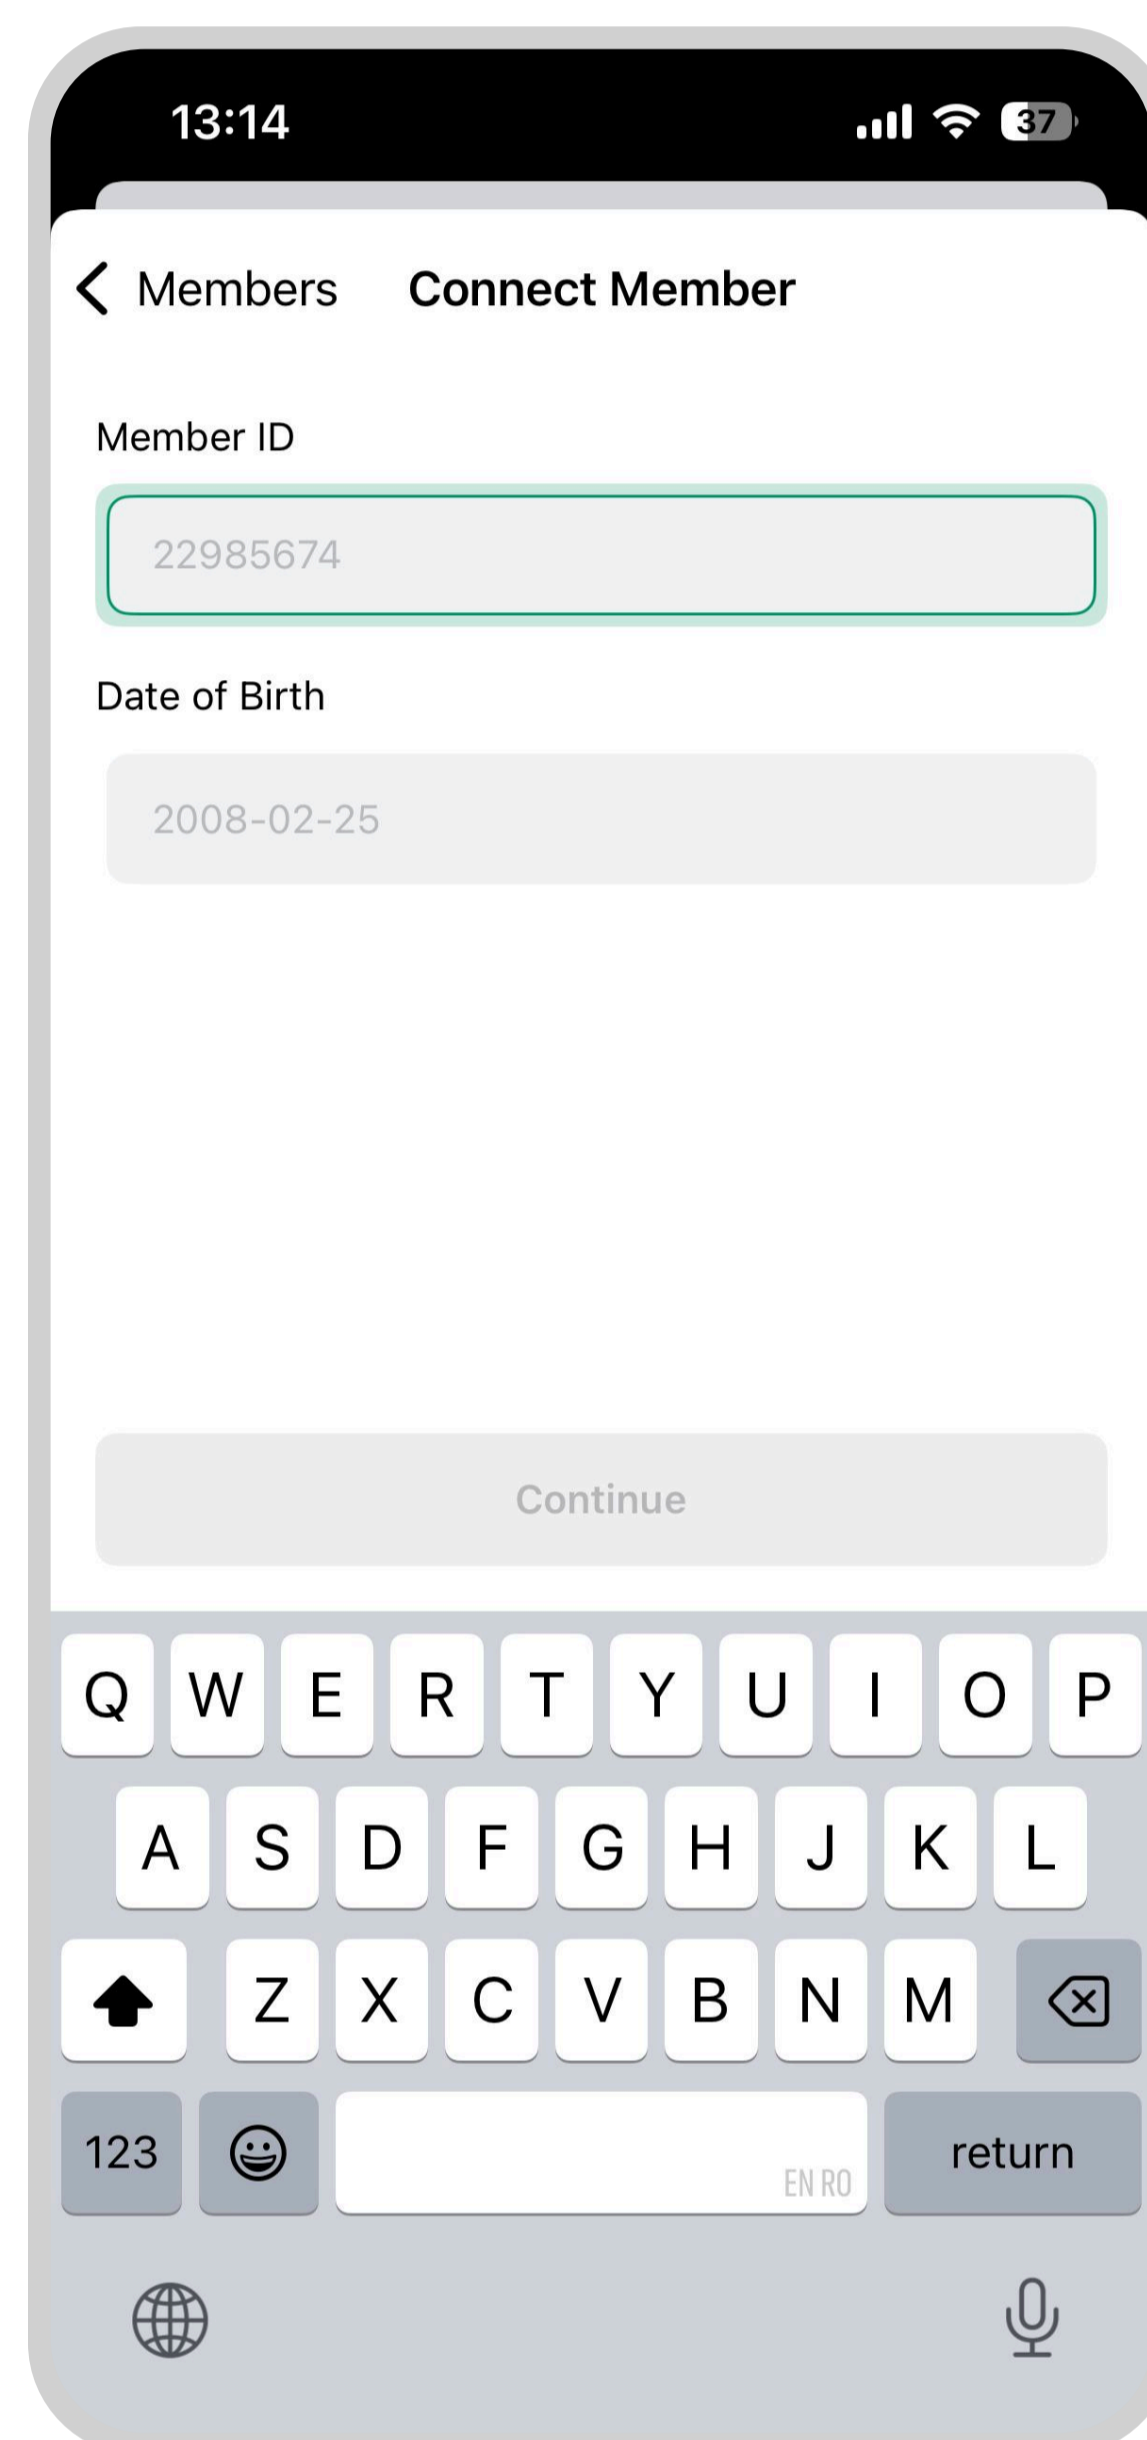

Step 5

Connect an eligible member to the account

You should see the Member app home page confirming you have created a "user account".

However a user account is different from a member account.

You must connect these two accounts to book and manage rides for yourself or other members.

Step 6

Enter member details

Next, select the "add Member" button, this will take you to the Connect Member Screen.

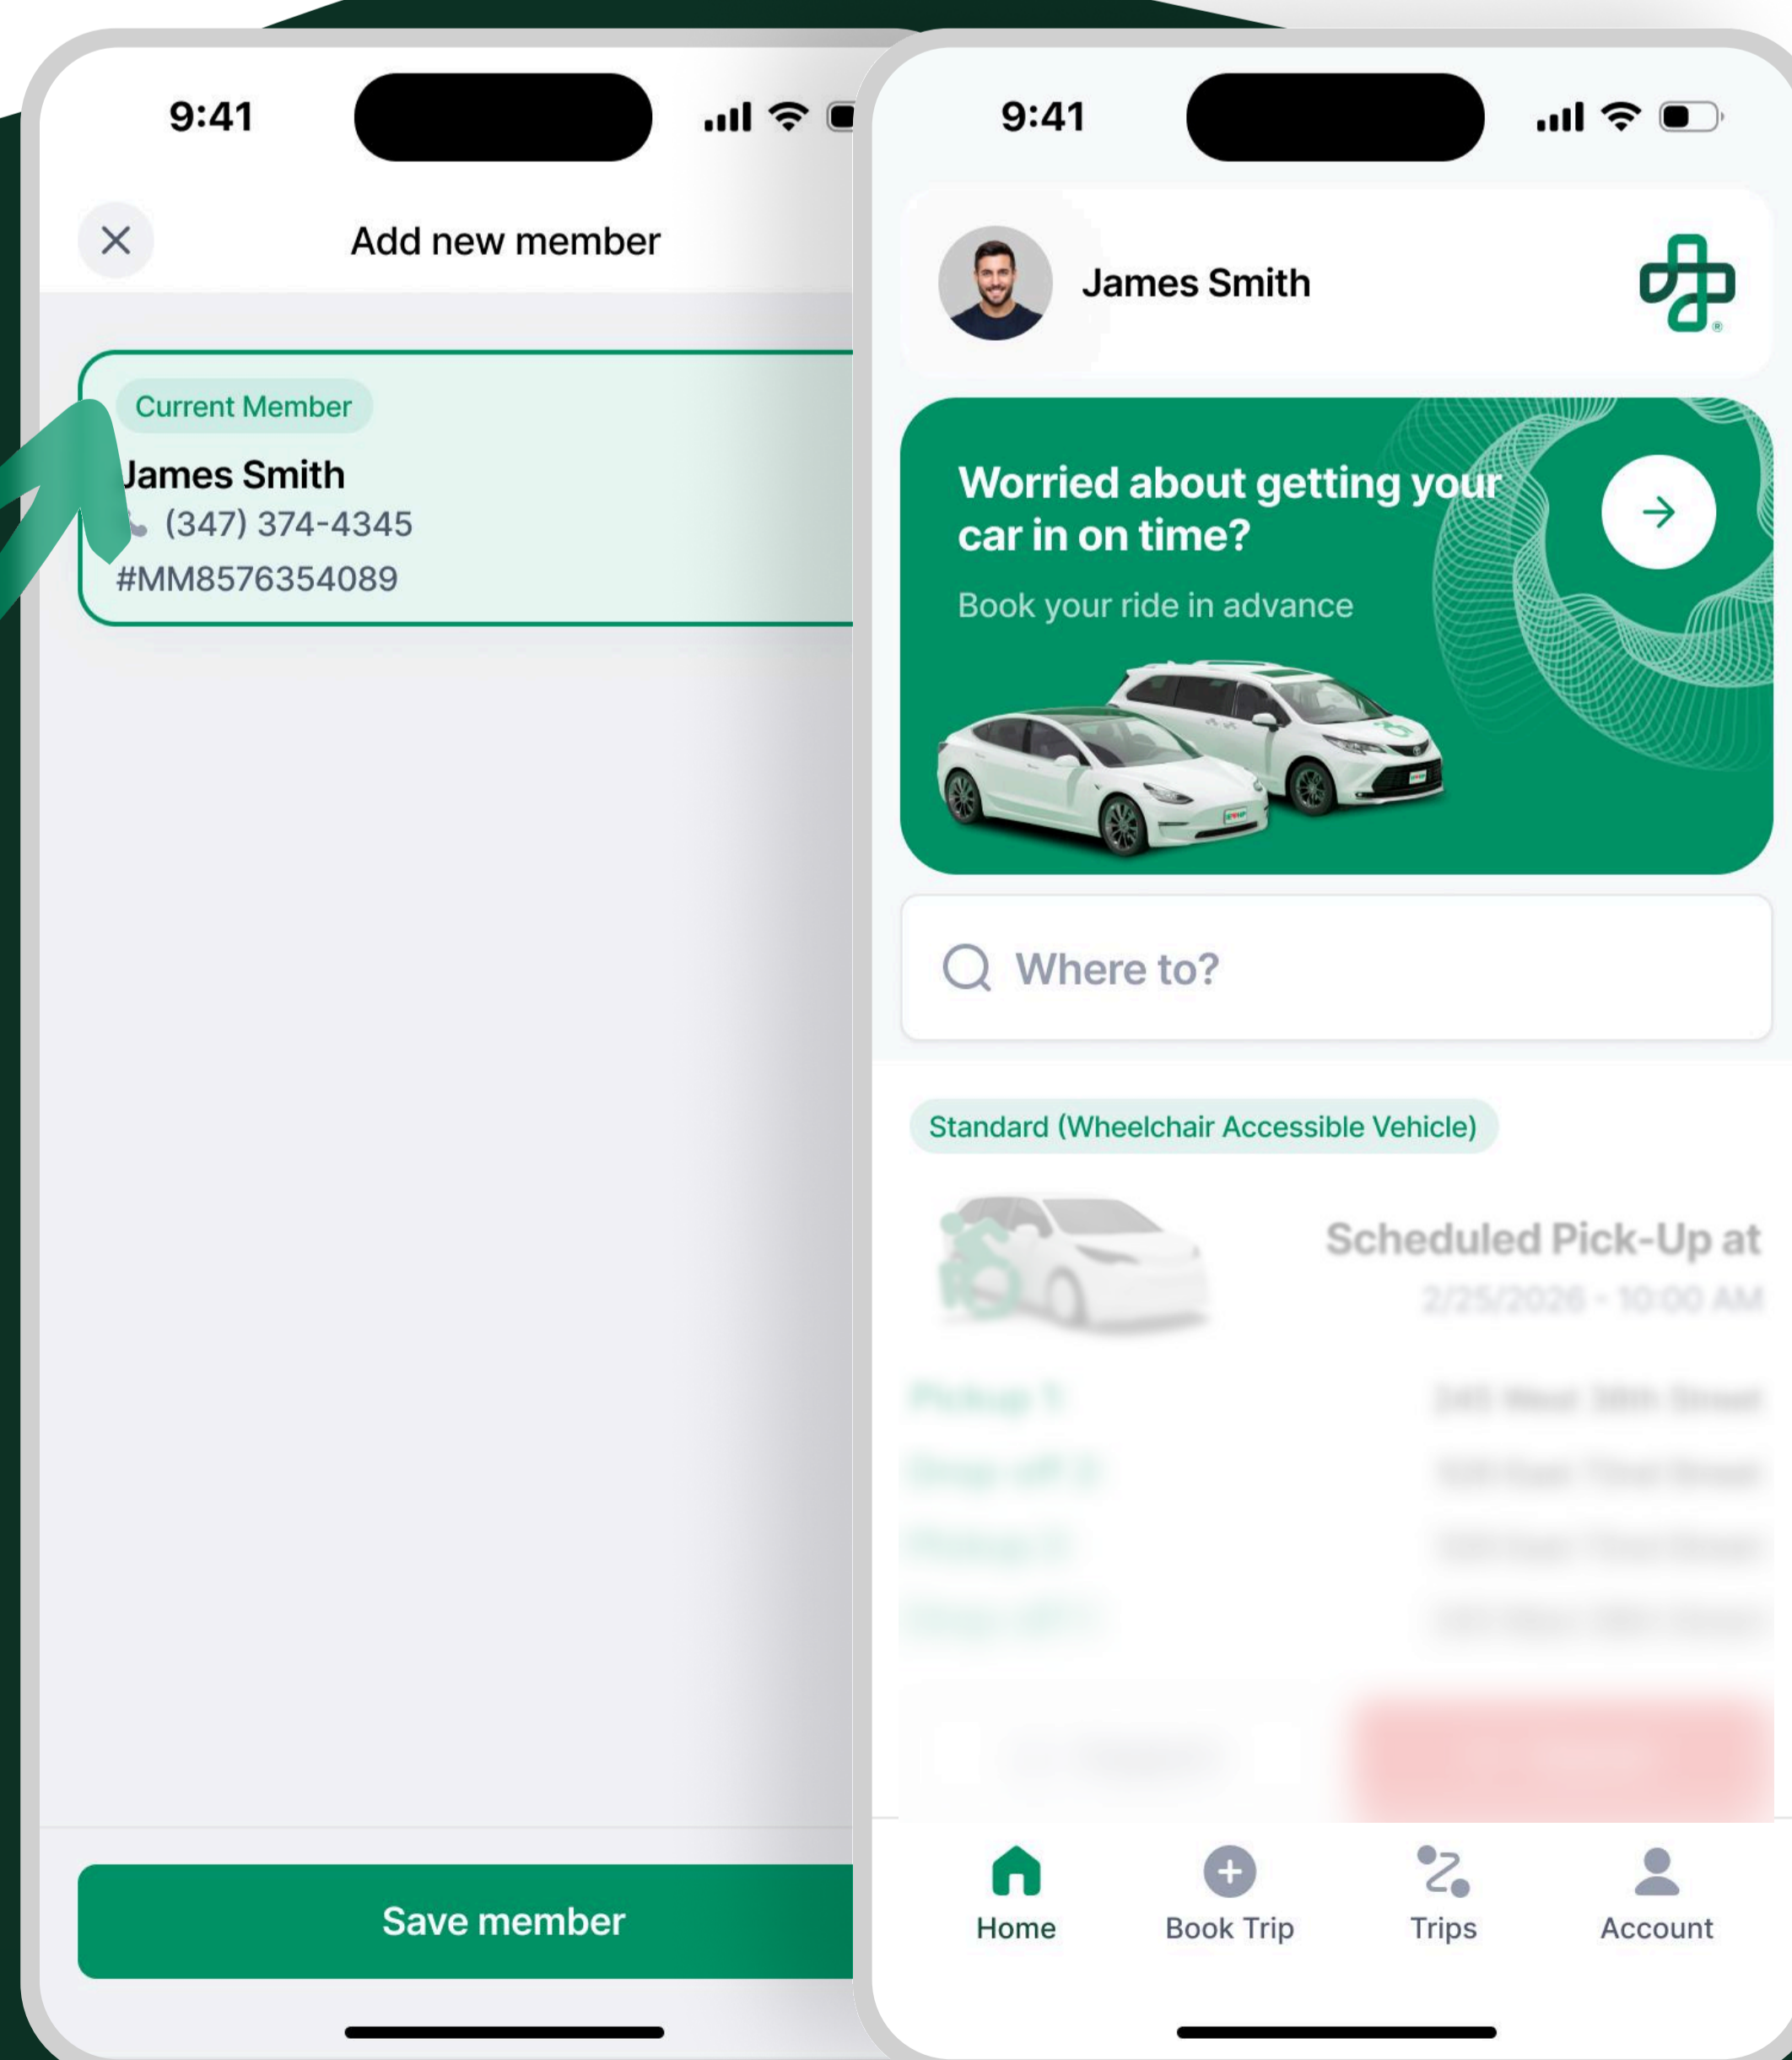

Enter the Member ID and Member Date of Birth to connect a member to your user account in the app.

After you have entered your member successfully, you will see the member information.

Close out the screen by hitting the "x" button.

Welcome to MediDrive.

You are now ready to book and manage transportation on the drive to better health.

Congratulations!

You are ready to start booking transportation with MediDrive.
